in Our Mind

Objective

The MCC course is designed to meet and exceed all the applicable FCL regulations and is made for pilots who have never flown in a multi-crew environment.

The course is offered on various aircraft types but experience shows that the most common aircraft type chosen by the candidates is the A320.

This course is offered as a stand-alone training or as an integrated module in our various initial type rating courses.

The course objective is to give you the necessary theoretical knowledge and practical skills to efficiently interact in a multicrew environment.

Entry Requirements:

- Valid CPL (ATPL theory) or ATPL;
- 100 hours as pilot in command or airplanes;
- Valid ME, IR (multi engine, instrument rating);
- Valid Class 1 Medical Certificate;
- ICAO English level 4.

Ground Training

- Aircraft Systems;
- Crew Resource management and human factors;
- Decision making, communications, diversion of tasks;
- Extensive use of checklists, mutual supervision, teamwork and support

Ground Training duration 05 days

Simulator Training

- Simulator (minimum) 07 sessions - 21 hours;

Flight Training duration 10 days – 21 hours

Training Material

All the necessary training material is provided by ATO this included:

- Books;
- Posters;
- Access to E Learning

Training Locations

Ground training is offered in Paris or on customer's premises for Airlines.
Full Flight Simulator training is offered in Jetway training locations.
